

SMTP stands for Simple Mail Transfer Protocol. It is a communication protocol used for sending and receiving email messages over the Internet. To configure email through google mail or Gmail you need to follow the following steps:

1. Click on your Gmail profile and choose Manage your Google Account option .

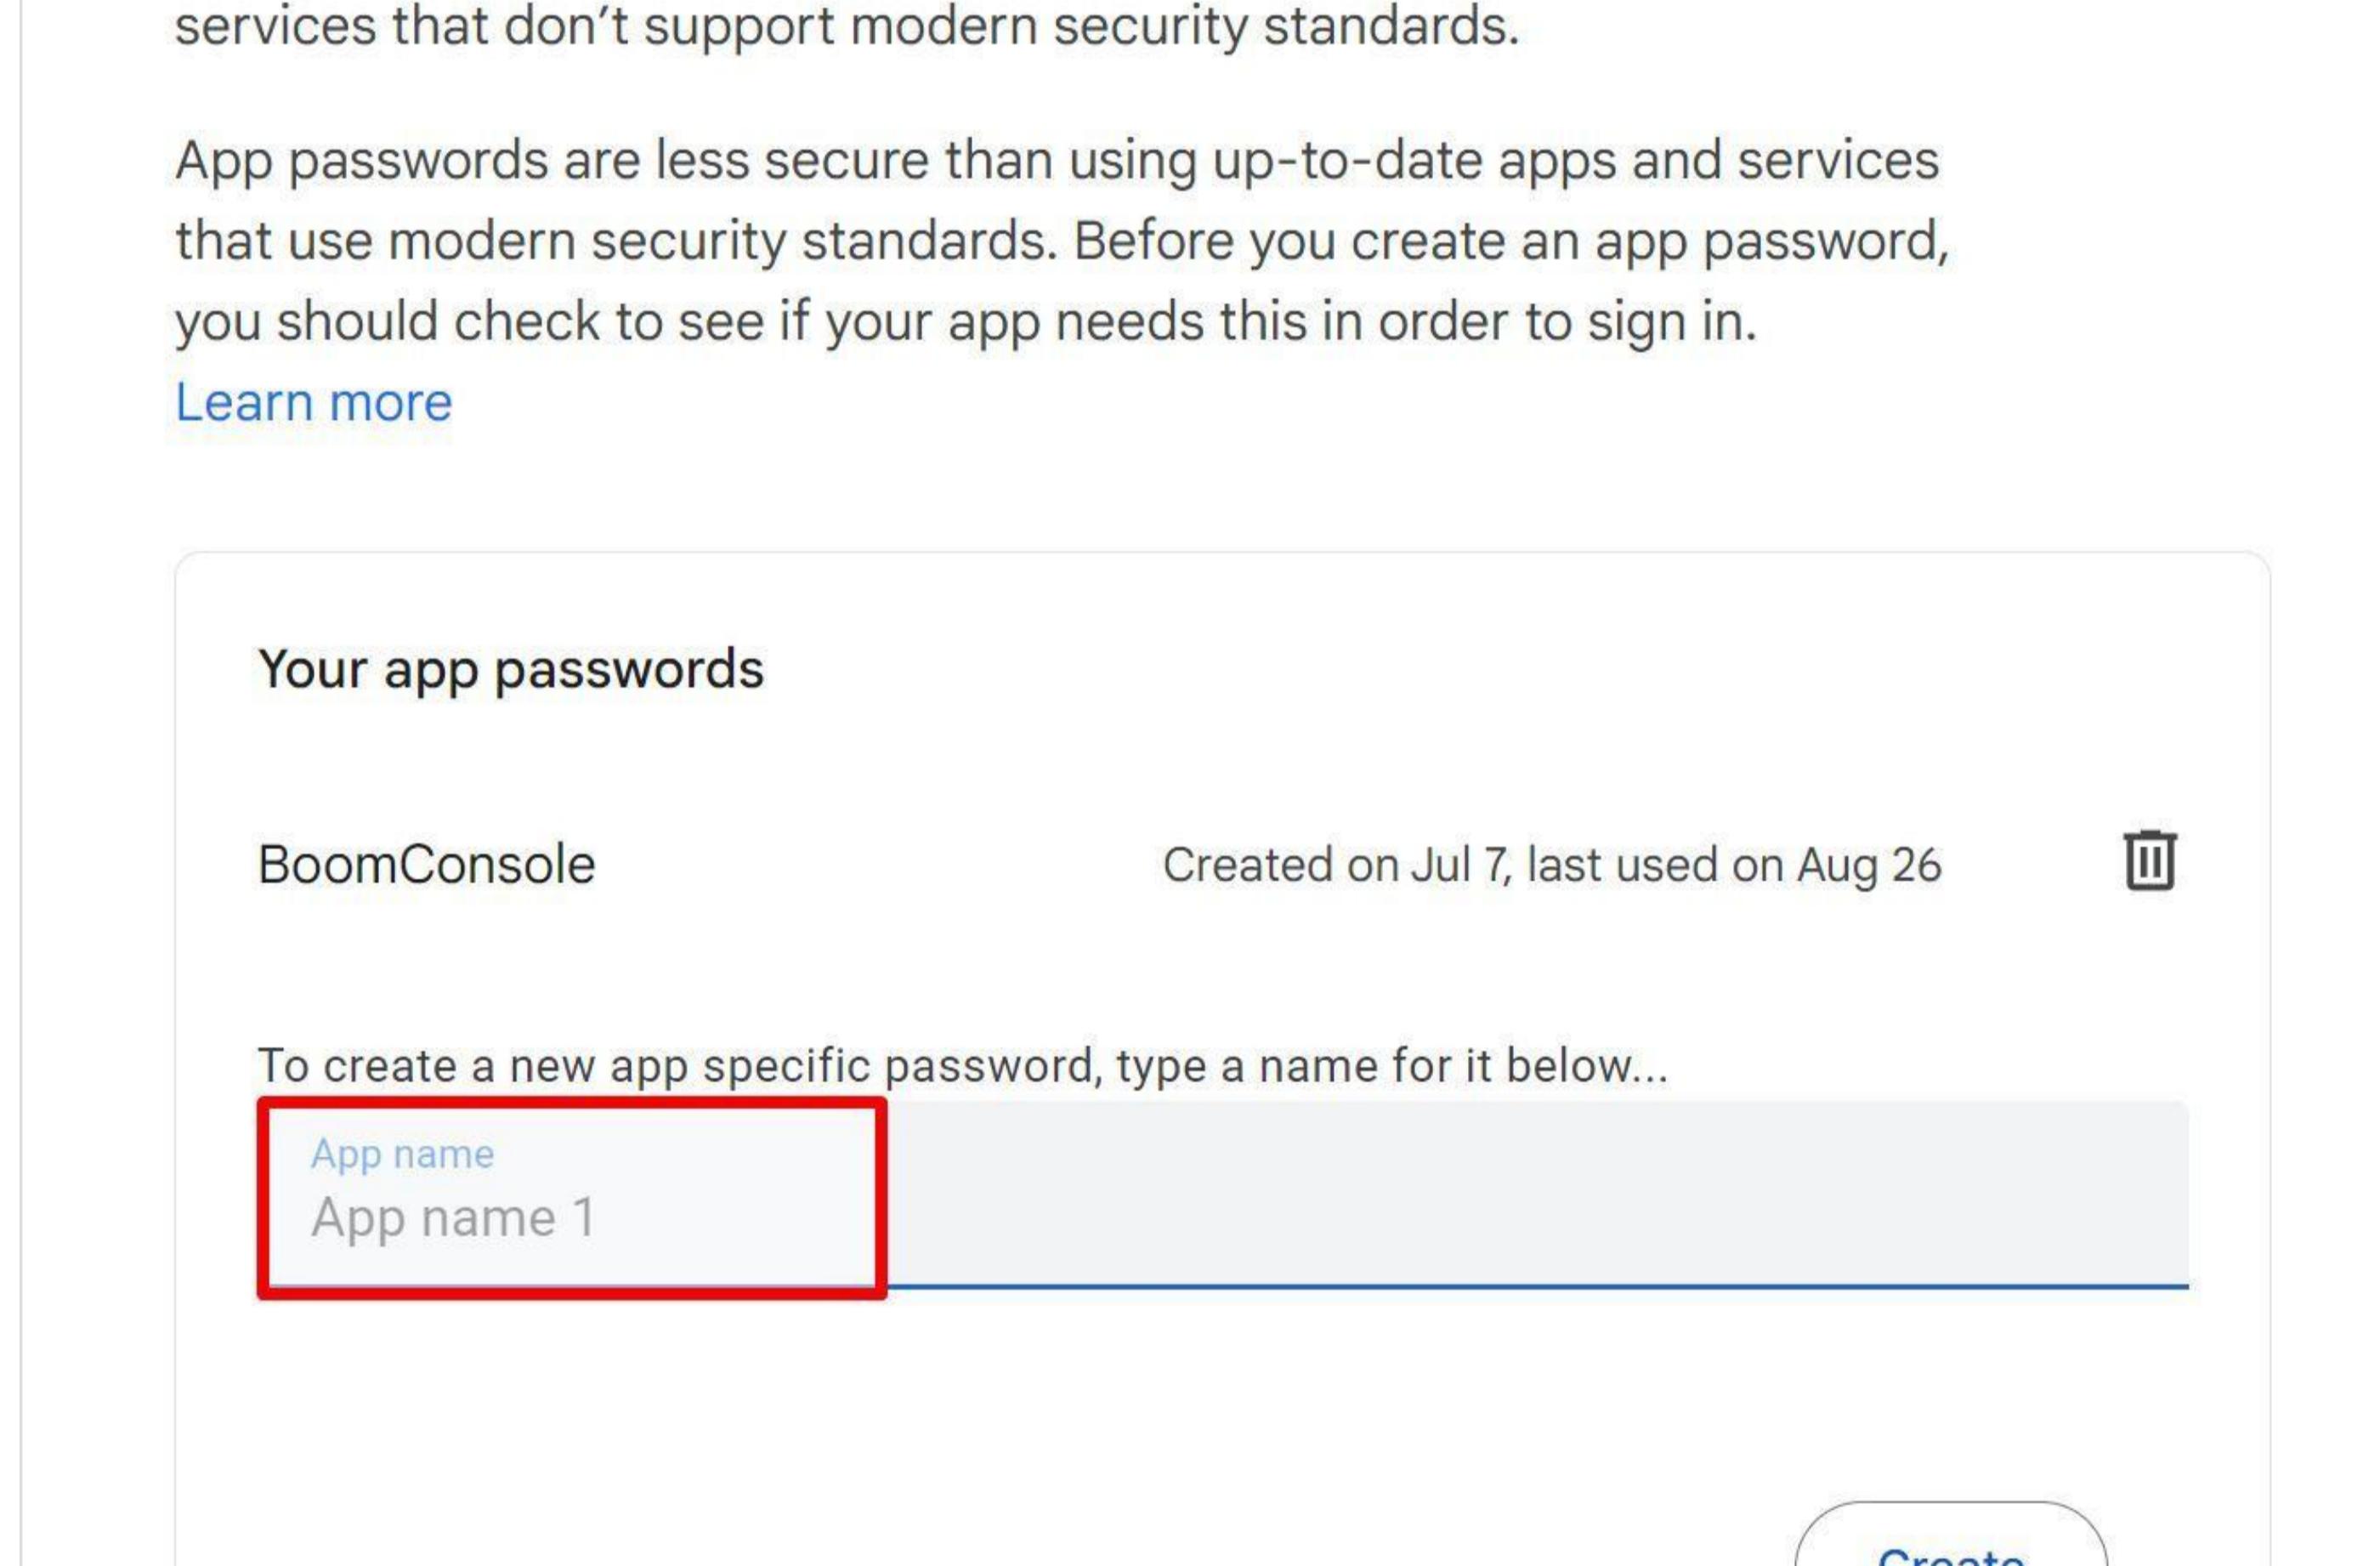

The screenshot shows the 'Manage Settings' section for 'SMTP for gmail'. It includes fields for 'SMTP Username' (you@gmail.com) and 'SMTP Password' (password). Below these are 'Advance Options' and a 'Test & Save' button. On the right, there's a sidebar with a profile picture for 'BoomConsole' and a message 'Sync is off' with a 'Turn on sync...' button. Other account details like 'Manage your Google Account' and 'Sign out' are also visible.

2. Make sure you have 2 step authentication in your gmail. If you don't have it, go to Security and set up your 2 step verification;

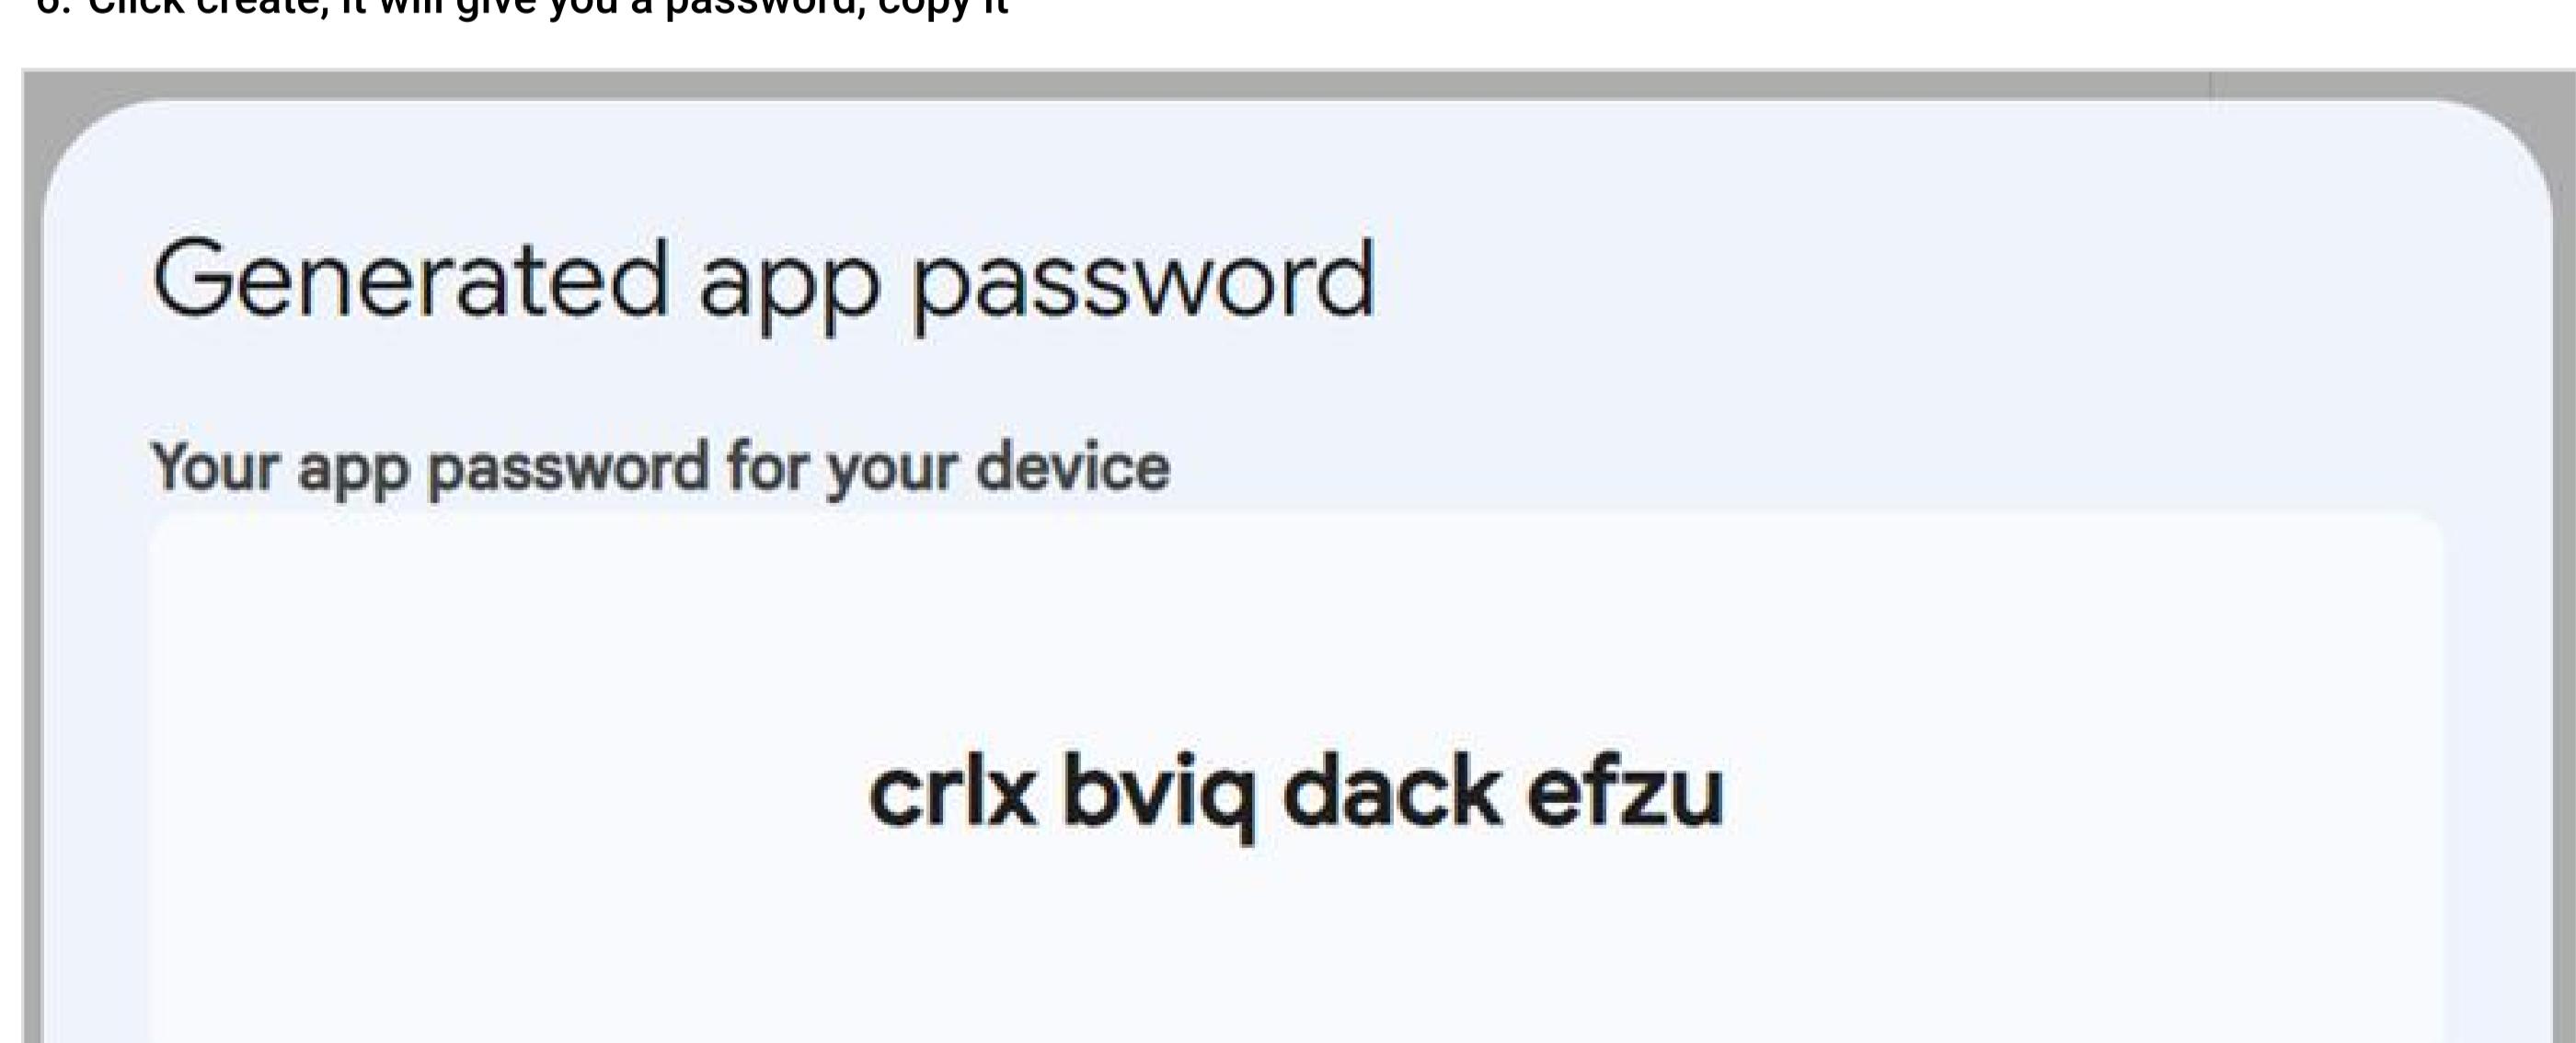

The screenshot shows the 'Security' settings page. It features sections for 'You have security recommendations', 'Protect your account', and 'Recent security activity'. Under 'How you sign in to Google', there's a list of options including '2-Step Verification' (which is currently off), 'Password', 'Skip password when possible', 'Recovery phone', 'Recovery email', and several buttons for adding more sign-in methods like 'Passkeys and security keys', 'Authenticator', 'Google prompt', and '2-Step Verification phone'.

3. Once set up, head to the search bar in 'Manage your Google Account' and search for "App Password".Click to open it.

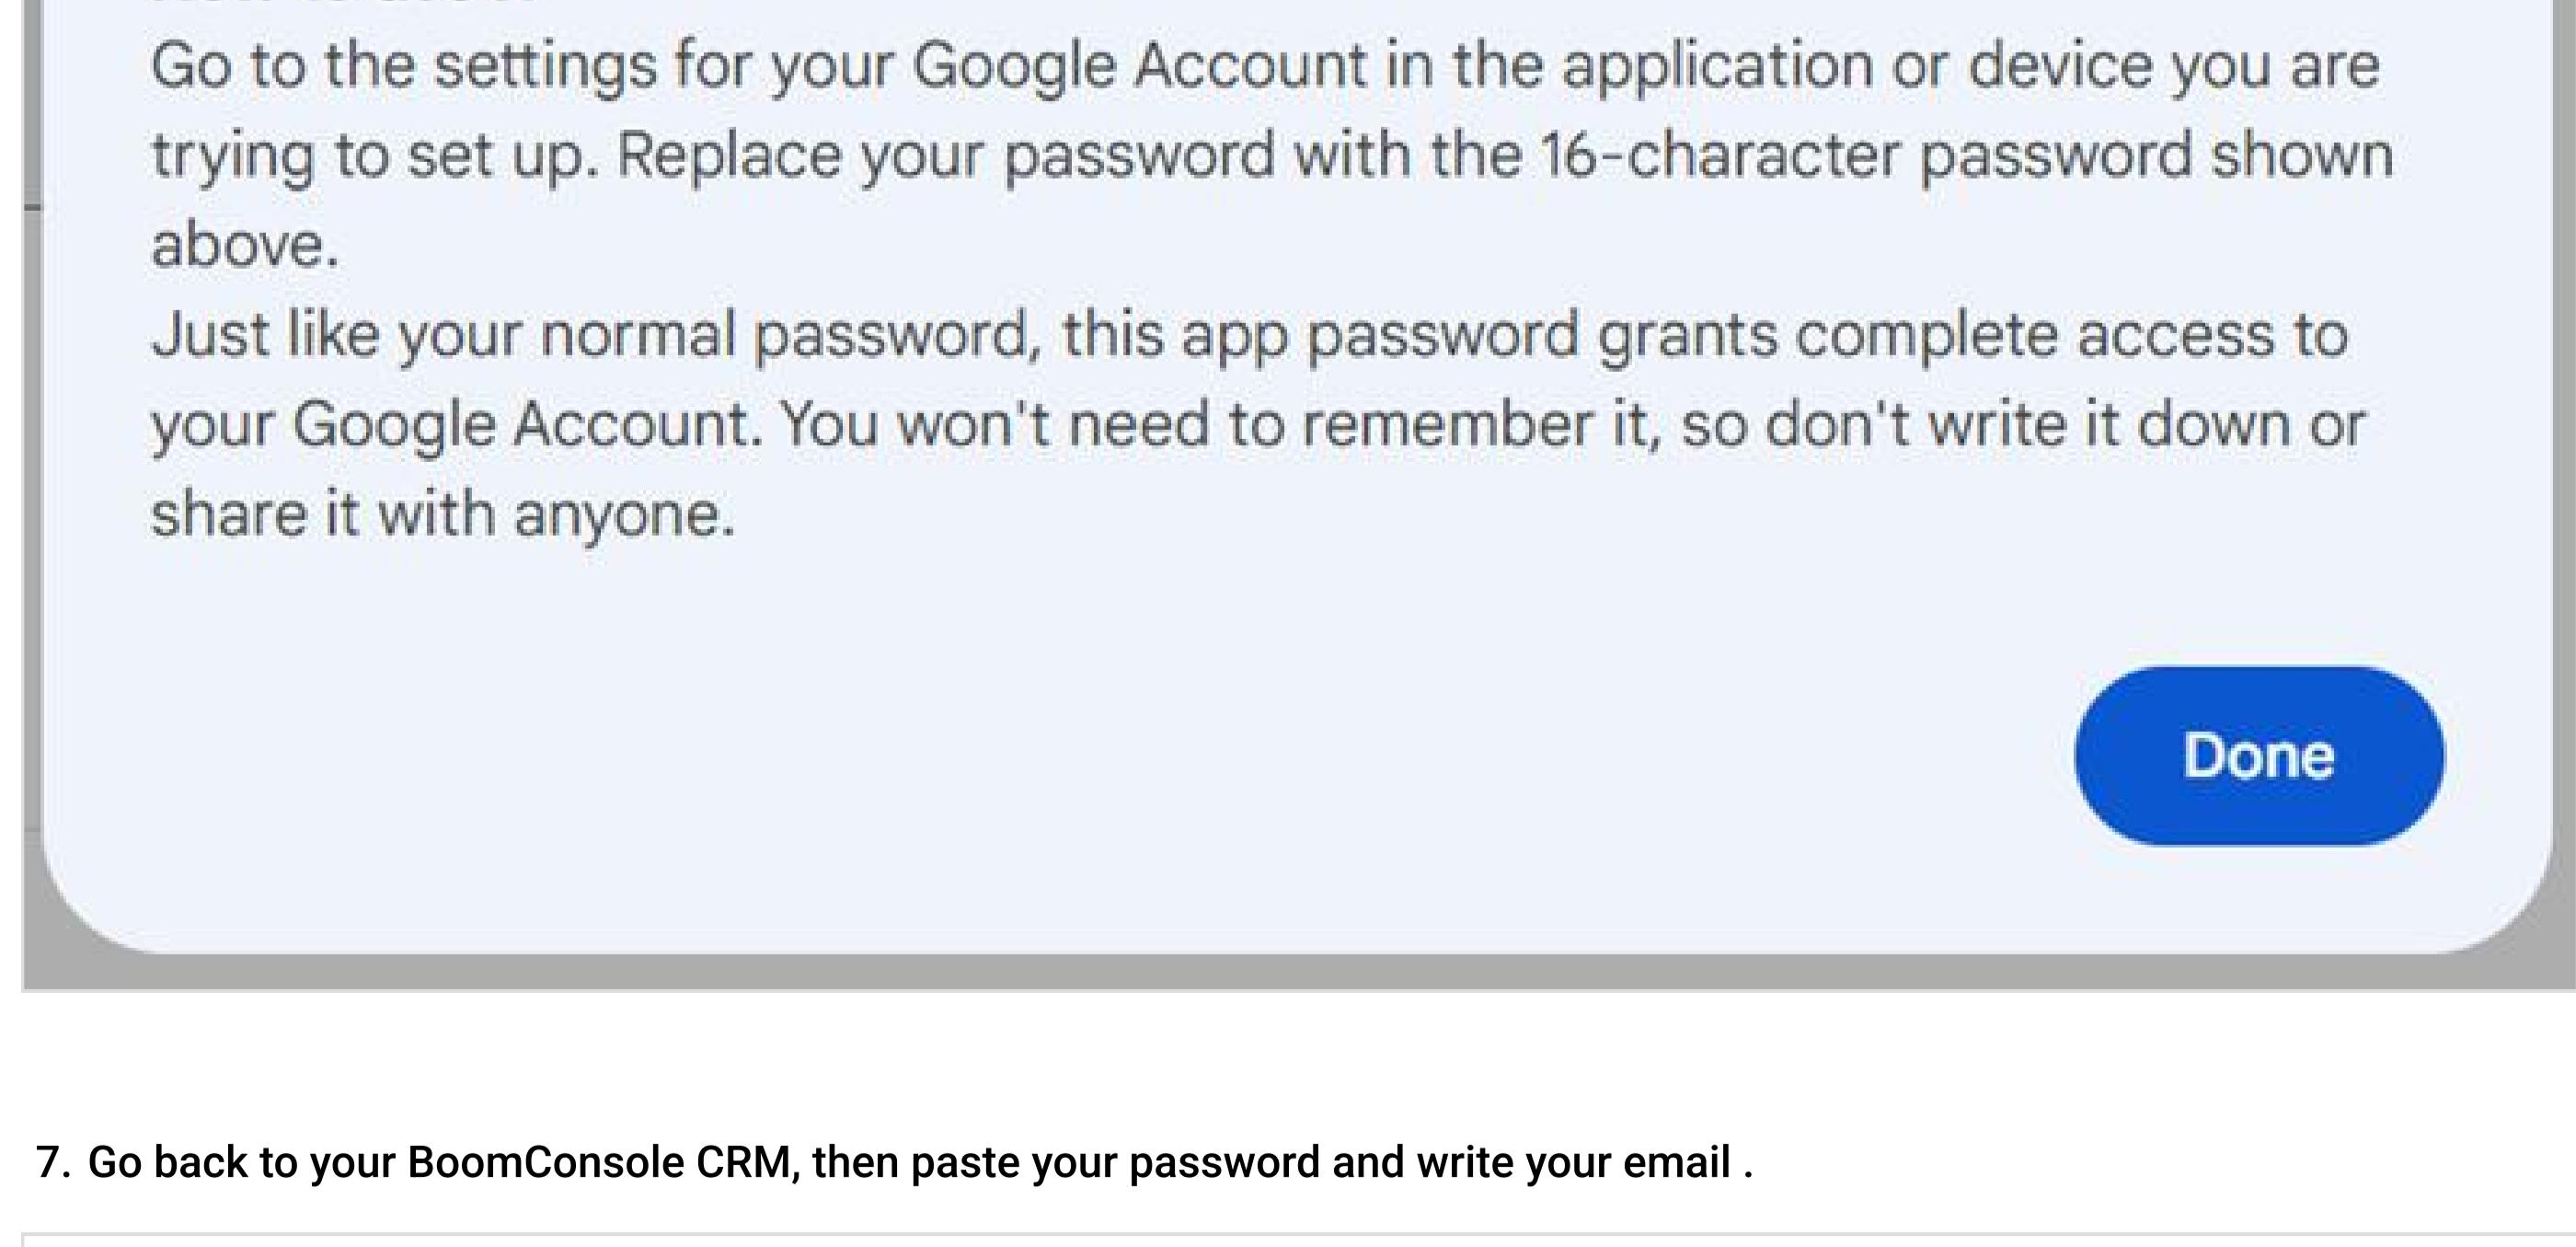

The screenshot shows the 'Google Account' search results page. The search bar contains 'App Passwords', which is highlighted with a red box. Below the search bar, there are sections for 'Google Account Results' and 'Help Center Articles', both listing various password-related options.

4. Gmail asks for your password to verify your account

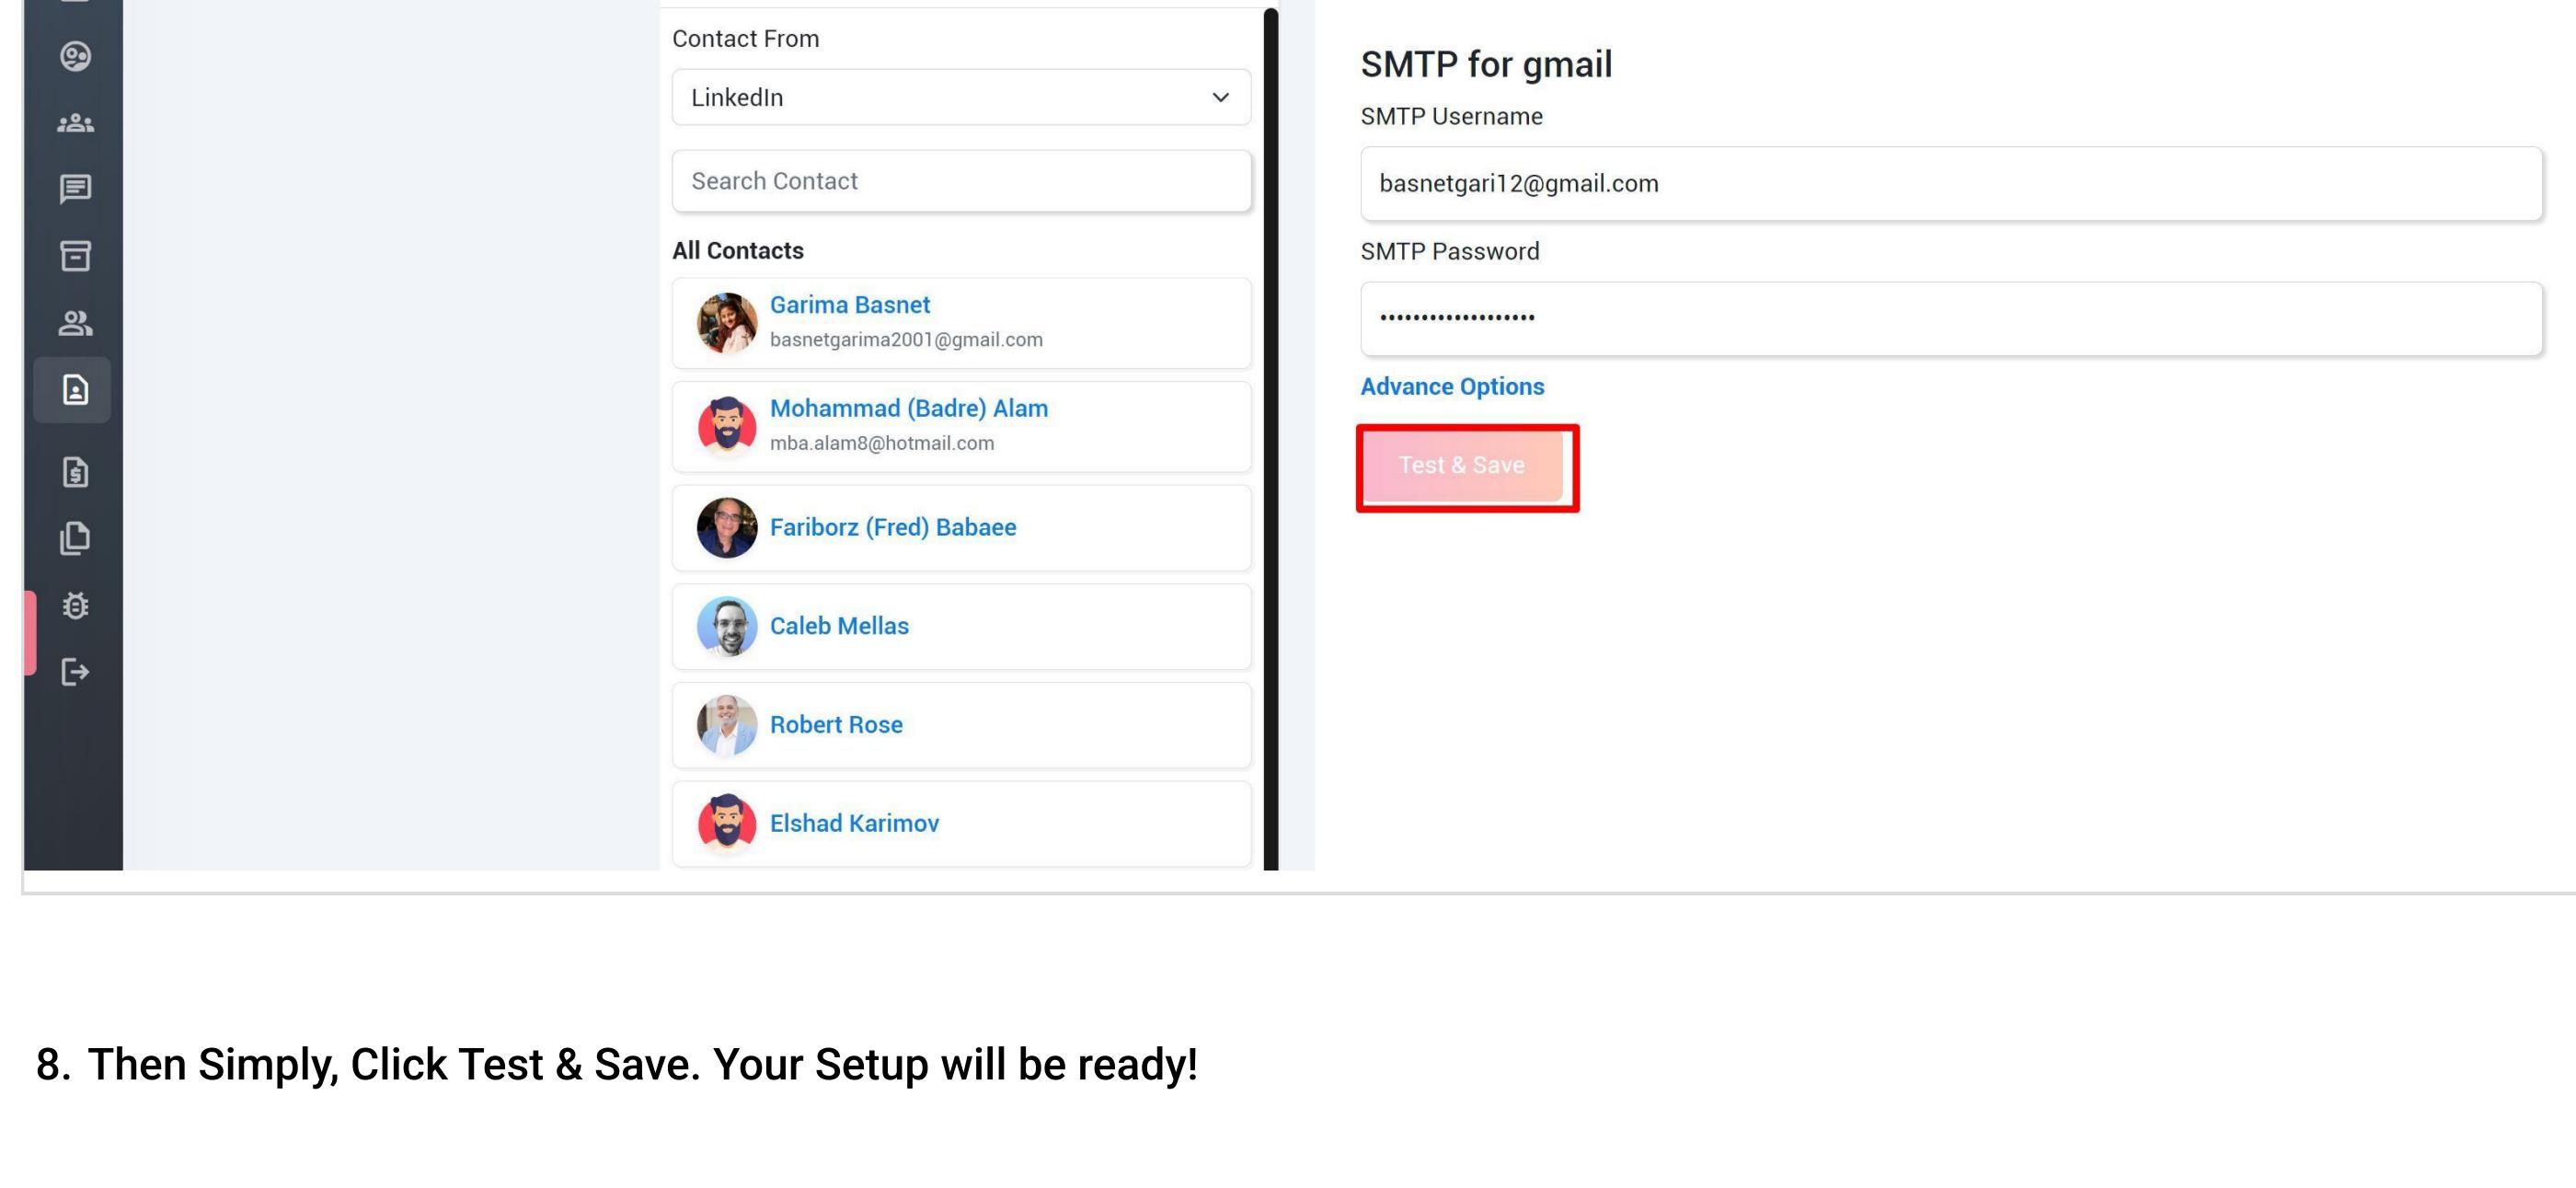

The screenshot shows a verification step in Gmail. It says 'To continue, first verify it's you' and has a password input field with a 'Show password' checkbox. Below the input field is a 'Try another way' link and a blue 'Next' button.

5. After verifying, create an app name it could be "BoomConsole" or anything that creates a passkey for that specific app.

The screenshot shows the 'App passwords' creation page. It lists an existing app named 'BoomConsole' created on Jul 7, last used on Aug 26. Below this, there's a text input field for 'App name' containing 'App name 1', which is highlighted with a red box. A large blue 'Create' button is at the bottom right, with a red arrow pointing to it.

6. Click create, it will give you a password, copy it

The screenshot shows the 'Generated app password' page. It displays the generated password 'crlx bviq dack efzu' in a large text area. Below the password, there's a section titled 'How to use it' with instructions and a 'Done' button.

7. Go back to your BoomConsole CRM, then paste your password and write your email .

The screenshot shows the 'Manage Settings' section of the BoomConsole CRM. It includes fields for 'SMTP Username' (basnetgari12@gmail.com) and 'SMTP Password' (redacted). Below these are 'Advance Options' and a 'Test & Save' button, which is highlighted with a red box.

8. Then Simply, Click Test & Save. Your Setup will be ready!
